WE LOVE LIVING NEAR THE BEACH!

HELLO!

our names are

Chance
& Molly

we live in

Glendale,
California

with our four
loving pets
(two dogs and
two cats)

We are two families in a tough spot, you are deciding whether or not to place your child for adoption, and we are trying to start a family in the face of infertility.

We know you have many options, and we hope to provide you one that is best for you and your child. Making a placement decision may be one of the hardest and least selfish decisions that can be made. **We are familiar with this kind of decision and struggle because I, Molly (and my younger sister), were placed at birth with our adoptive family, and it has been a blessing for both sets of parents.** We have been praying to find the right situation and we are confident our prayers will be answered. We are excited that you are looking at our family as a potential adoptive family. We have a lot of love to share, and we promise that your child, if placed with us, will grow up in a loving and nurturing faith-oriented family and community. We are thankful that you would consider us as prospective parents and we will be praying that you will find the best path for you and your child.

OUR STORY

ALL SMILES WITH OUR PUPS

Our love story started in Alaska!

WE LOVED LIVING IN ALASKA

We met on a dating app. Chance had moved to Alaska to enjoy its wilderness areas after a stint in Hawaii. Molly had moved to Alaska for a planned 1 year to visit her birth-brother.

We found we had several things in common, including a faith in God, and a love for hiking, camping and dogs. Our first date was meeting at Petco with our dogs; we stood in the snow for hours talking after the store closed. When we decided to get married, two key elements of that agreement were that we would move to Southern California and that we both wanted children.

In SoCal, we had a marriage celebration that our family and friends attended; and we settled into our current home, found good jobs, and joined our community. Chance immediately plugged into our church, volunteering to help with the audio-visual ministry and he found some golf buddies. In 2022, we found out we both had physical challenges for conception and that the window for a successful pregnancy had passed; so then, without hesitation, we agreed to start looking at adoption as a way to have a family.

OUR HOME

WE LIVE IN A
two-bedroom home in

**Glendale,
California;**

it is a short drive
to the dog beach,
where we love to
take our dogs.

We also live just minutes from Brand Park and Griffith Park and it's zoo, where we like to hike.

SoCal is full of easy to reach cultural and sporting venues, like our favorite Dodger Stadium. Our home is right next door to our church building. Glendale is a very good school district, and we are in walking distance of the elementary school. Burbank has a beautiful public golf course where you might see Chance playing and Molly driving the golf cart. Molly loves to garden but doesn't really have a green thumb. Chance has built a wooden fence around our backyard for privacy. Chance enjoys entertaining at our home and smoking meat on his grill. Molly loves to decorate the house for holidays.

Lessons we will teach our future child

THE MOST IMPORTANT VALUES ARE TO **LOVE** **GOD**, YOUR **FAMILY**, AND YOUR **COMMUNITY**.

HAVING A **GOOD HEART** IS MORE IMPORTANT THAN BEING POPULAR OR FINANCIALLY WEALTHY.

FIND WEALTH IN LIVING A **KIND AND CARING LIFE**.

RENAISSANCE FAIR WITH CHANCE'S COWORKER AND HIS CHILD

We have 5 adult family members living within 3 miles of us, including Molly's adoptive parents, her adopted sister and husband, and her aunt.

Traditions and holidays are a big part of our family, including decorating and spending time together. Pick a holiday, accomplishment or birthday, and you will find us celebrating over a family meal, playing a game, and corralling three sets of dogs. Our family enjoys 8 season seats to the Saturday night summer musical concerts at Burbank's amphitheater. We are also active in our diversified church community and have extended family all over Oklahoma and Texas. **Molly and her sister were adopted from birth. It is comforting to know that we have so many dependable and loving friends and family so close to us that we can enjoy and count on.**

We have a strong set of traditions and values that will influence our parenting. We have the tradition of openness in our adoption history; our family regularly shared openly each child's development with the birth parents.

We have always, and plan on, spending holidays, birthdays, vacations, and special events as a family group whenever possible. Our value sets are primarily based on our faith and our desire to be gentle, kind, and considerate people. These values start at home with each other and grow with interaction within our community. Children, like adults, have thoughts and feelings too; they should be treated with dignity and respect. We are committed to nurturing and developing a child's healthy independence, confidence, and self-awareness. We do not have specific designs for developing a child's interests but will provide opportunities and resources for them to pursue their own interests and talents.
